Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 35-39, 43-49, 55, 57, 58, 59-68, 71-76 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kohama, et al. ("Kohama")(US 6,412,701B1).

Kohama discloses a method comprising forming bumps using a bonding tool(col. 4, lines 15-24); positioning the semiconductor device on a thermoplastic resin sheet(col. 5, lines 1-5 and col. 20, lines 8-11); melting the sheet and pressing (col. 12, lines 48-52); cutting the thermoplastic resin(col. 18, lines 23-26).

Although Kohama is silent with respect to the limitation "except for end surfaces of the bumps", it is believed that Kohama encompasses this limitation because Kohama

Art Unit: 2825

discloses that part of the structure may be exposed (col. 2, lines 66-67 and col. 3, lines 1-4).

Kohama also discloses an apparatus which includes a pressurizing device for forming the device (Fig. 16 and Fig. 17). It is considered that the further limitations of the apparatus claims are limitations on the product produces, and do not contain apparatus limitations.

Claim Objections

Claims 54 and 56 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 54 is a method claim which does not recite method steps.

Claims 40-42, 69, 70 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The claims are dependent claims which seem to be written in independent form and then include the claim dependence, so that it is unclear that they are dependent claims.

Allowable Subject Matter

Claims 50-53 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2825

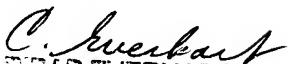

The prior art of record does not teach or suggest inter alia the limitations "the contact area increasing portion is formed...brought in contact with the bump or the pattern forming surface located in a vicinity of the bump when the contact area is increased...".

The prior art of record not relied upon is considered relevant to applicant's disclosure as background references.
